

IS53007D: Computing Project (2017-18)
Computer Science BSc
Goldsmiths College, University of London

Weekly Log

Jordan Brannan - 33482272

Date - 21/02/2018

Supervisor - James Ohene-Djan

This week, high fidelity digital prototypes have been created using Adobe Photoshop based off the low fidelity prototypes created previously with MockFlow. These prototypes will then be used as the basis for the working prototypes. A survey has also been carried out with a school and results have been gathered to identify key information to incorporate within the applications.

For the following week, Ionic Frameworks and a template from ThemeForest will be explored and start to be developed based off of the digital prototypes. As well as this, I will be working towards completing the Literature Review for the Final Project Report and formatting Latex correctly.
